# The concept FONTAINEO

# The concept FONTAINEO

**FONTAINEO** embodies a social and environmental initiative aimed at enriching community life through innovation that benefits everyone. By providing access to drinking water without plastic bottles, we are helping to reduce waste, protect the environment and enhance local areas. Our goal is to create welcoming spaces and guarantee safe access to water, while supporting the local economy and reducing carbon footprints. **FONTAINEO** is thus establishing itself as a key partner for all communities committed to sustainable water management.

**Bernard CANONNE**  
— Founding Chairman of Fontaineo

## Our commitments in 6 points

### 1. SERVICE

↳ Making water accessible to all and enabling regular hydration

### 2. FRIENDLINESS

↳ Create spaces for socialising and interaction, combining relaxation, enjoyment and hydration.

### 3. ENVIRONMENTALLY RESPONSIBLE

↳ Combating the proliferation of plastic bottles, preventing water wastage and supporting environmental transition

### 4. IMAGE

↳ Enhance your territory and image with customised fountains and containers

### 5. INFORMATION

↳ Becoming a medium for communication and information

### 6. HEALTH

↳ Provide still, chilled and/or sparkling water of impeccable sanitary quality.

- In a context where environmental regulations are becoming more stringent, FONTAINEO is committed to a responsible and sustainable approach.
- Our eco-friendly water fountains comply with ADEME principles and AGEC legislation, promoting a more environmentally friendly future.
- Thanks to our advanced filtration systems, we guarantee high-quality water while preserving natural resources and reducing plastic waste.
- Our approach is also in line with the circular economy: robust, repairable water coolers designed to last.

**Our commitment  
towards sustainability**

# FONTAINEO crosses borders

## GADELOUPE

Our solutions integrate easily into cities and tourist areas, ensuring a lasting impact.

## Switzerland

Local authorities and businesses trust our water coolers to provide a continuous supply of high-quality water.

## LUXEMBOURG

Our solutions integrate easily into cities and tourist areas, ensuring a lasting impact.

# A 100% customisable solution

Made in Franche-comté

Communication medium

Quality water

Indoor & Outdoor

Connected

Environmentally friendly

# The steps to successful customisation

## 1. Selection of the layout

Lettering: logo, messages, colours, full or partial covering

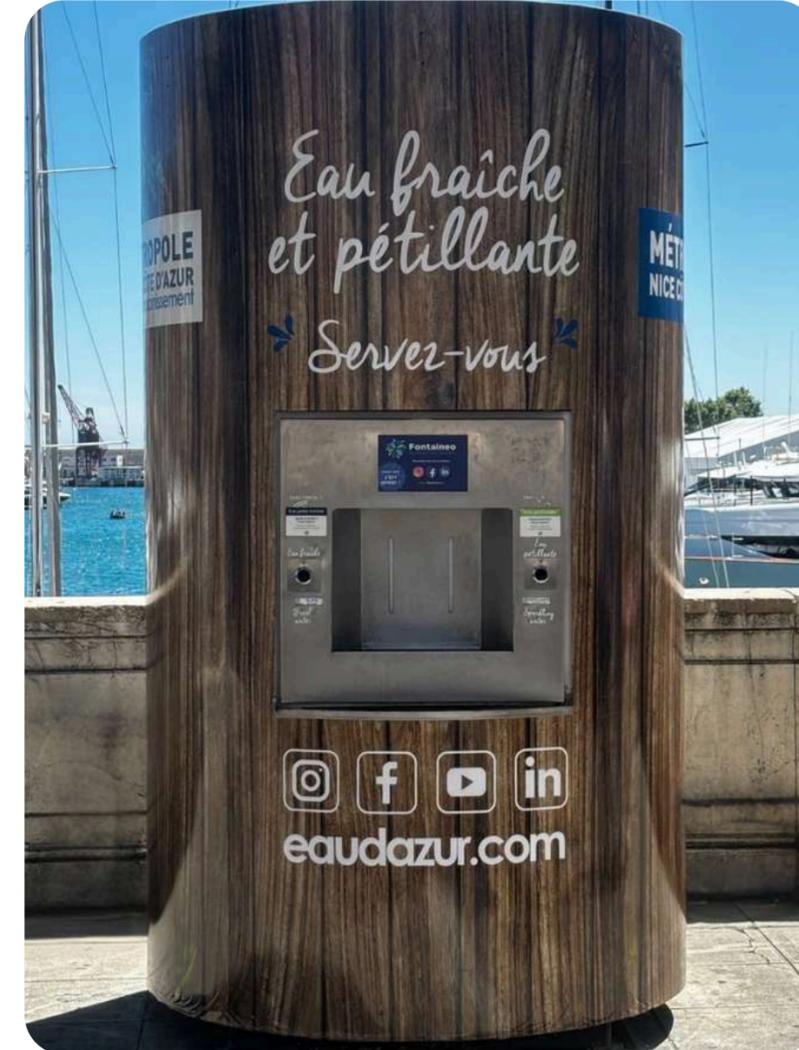

## 2. Creation of visuals

Complete graphic design with scenario simulation

## 3. Integration of visuals

Integration of your visuals or graphic charter into our templates

## 4. Spreading the word

A truly dynamic communication medium

# 02 Our products

# AQUA'tys

# AQUA'tys

AQUA'tys is a mains-connected water cooler with a minimalist design, designed to blend harmoniously into any modern interior space. Combining performance, efficiency and environmental commitment, it embodies FONTAINEO's vision: a responsible, sustainable and attractive solution for water management.

Flow rate: Unlimited still water dispensing  
 Weight: 20 kg  
 Height: 900 mm  
 Width: 500 mm  
 Panels: Maximum capacity 1.5L  
 Frame: 304 L stainless steel + thermoformed front panel  
 Power consumption: 100 W  
 Power supply: 230 V  
 Battery: 6V or 230

# ENCASTRABLE

This ENCASTRABLE water fountain, designed for indoor and outdoor installation, is ideal for port environments. Designed to blend seamlessly with the existing architecture, it combines functionality, discretion and enhancement of spaces, while offering a sustainable solution connected directly to the water supply.

Flow rate: Up to 200 litres of fresh water per hour

Weight: 100 kg

Height: 700 mm

Width: 700 mm

Panels: 304L or 316L stainless steel

Installation: Outdoor, indoor

Power consumption: 900 W

Power supply: 230 V

# PRIM'O light

The **PRIM'O light** is a compact, stylish mains-connected water fountain designed for simple, intuitive use thanks to its integrated container detection system. Fully customisable, it blends harmoniously into any environment: parks, stadiums, streets or squares, offering an elegant and practical solution for outdoor access to water.

Flow rate: Unlimited distribution of still water from your network

Weight: 80 kg

Height: 1300 mm

Width: 400 mm

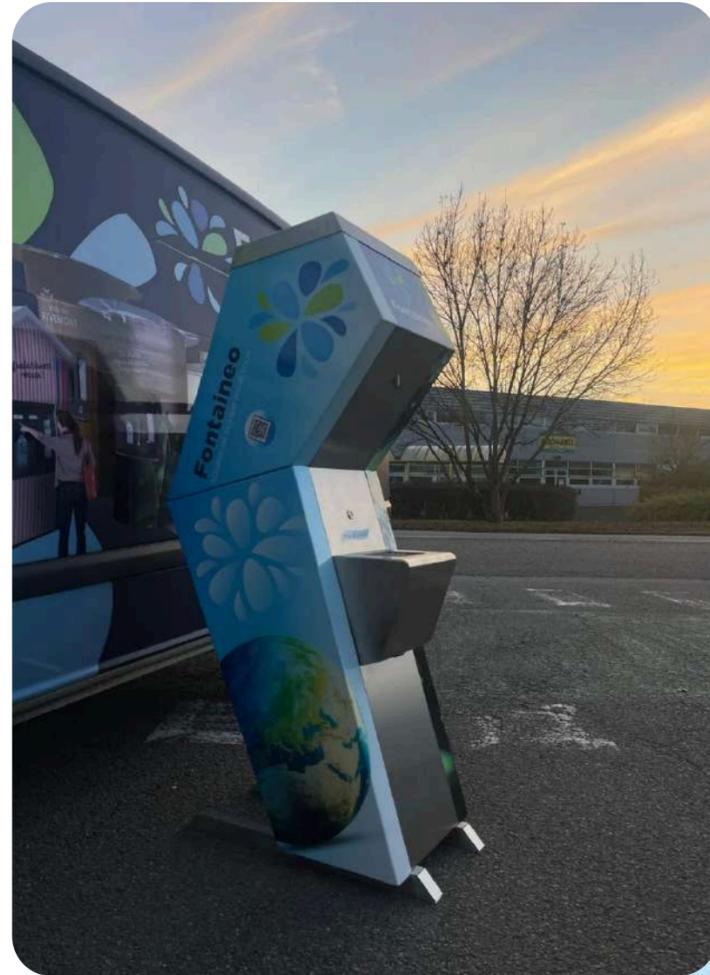

Panels: 304 L or 316 L stainless steel, recycled and recyclable materials

Frame: Galvanised steel

Installation: Indoor, outdoor, floor mounting

Power consumption: 30 W

Power supply: 6 V battery or 230 V

# PRIM'O

The PRIM'O water cooler, a genuine mains-connected water cooler, combines modern design, compactness and ease of use. Its container detection system, integrated into the panel, ensures intuitive use. Fully customisable, it blends harmoniously into any environment.

Flow rate: Unlimited distribution of still water from your network

Weight: 100 kg

Height: 1900 mm

Width: 400 mm

Panels: 304 L or 316 L stainless steel, recycled and recyclable materials

Frame: Galvanised steel

Installation: Indoor, outdoor, floor mounting

Power consumption: 30 W

Power supply: Solar (battery-powered) or hybrid (solar + 230 V)

# SOURCEO LIGHT

The **SOURCEO Light** water fountain is a high-performance hydration solution capable of providing up to 100 litres of fresh water per hour. Suitable for both indoor and outdoor use, it is ideal for professional spaces and events. Thanks to its rear castors, it is easy to move around and combines design, practicality and customisation, making it a communication tool that reflects a brand's image.

Flow rate: 100 litres of fresh water per hour

Weight: 100 kg

Height: 1600 mm

Width: 500 mm

Length: 500 mm

Panels: Dibond

Frame: Electro-galvanised steel

Installation: Indoor, outdoor, floor-mounted on adjustable feet

Power consumption: 900 W

Power supply: 230 V

# SOURCEO

The **SOURCEO** mains-connected water fountain combines design and performance to offer a compact, elegant and responsible solution. Designed and manufactured in France, it is suitable for both indoor and outdoor use, while embodying **FONTAINEO's** ecological and technological commitment.

Flow rate: 100 litres of fresh water per hour

Weight: 230 kg

Height: 1800 mm

Width: 600 mm

Depth: 600 mm

Panels: 304L/316L stainless steel, recycled materials

Frame: Painted steel

Installation: Indoor, outdoor

Power consumption: 900 W

Power supply: 230 V

# SOURCEO +

Are you looking for an effective mobile communication tool? The SOURCEO+ water fountain delivers up to 200 litres of cool water per hour, with an automatic detection system for smooth and hygienic use. Easy to install, it adapts to any space, indoors or outdoors, and can be customised to reflect your image.

Flow rate: 200 litres of fresh water/hour

Weight: 250 kg

# 03 Services & support

# FONTAINEO follows you

*From your first phone call to the installation of your fountain... and beyond.*

**1**

## Initial contact

We talk with you to understand your project, your uses and your environment. From this initial discussion, we identify the technical and regulatory constraints and the objectives to be achieved.

**2**

## Personalised study

Our teams carry out a technical study to determine the most suitable solution. Layout, model, options and customisation are designed with you, based on your actual needs.

**3**

## Installation

Our FONTAINEO technicians will install your water fountain on the agreed date. Installation is quick, secure and complies with current health and safety standards.

**4**

## Maintenance & Monitoring

We provide regular maintenance and monitoring of your equipment. Inspections, servicing, replacement of consumables and technical support guarantee long-term water quality.

# Maintenance

## Fontaineo technicians, trained to our exacting standards

At FONTAINEO, maintenance is carried out by our own technicians, trained in our equipment and quality standards. They intervene throughout the life of your water cooler to guarantee drinking water that is safe, healthy and compliant with current health standards.

## Comprehensive, controlled servicing

Each service includes checking the equipment, cleaning and disinfecting the water circuit, replacing consumables and verifying that the water cooler is working properly.

## Maintenance tailored to your needs

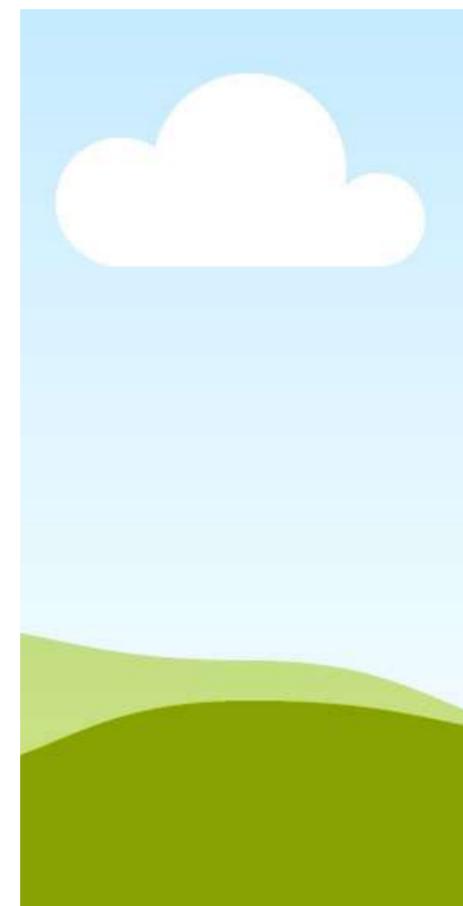

Depending on your usage and environment, maintenance is tailored to ensure reliability, security and continuity of service.

## Long-term personalised support

With FONTAINEO, you benefit from personalised, responsive and professional support over the long term.

**Nos techniciens**

# Purchase FONTAINEO

## Un investissement durable

When you purchase a FONTAINEO fountain, you are choosing a solution designed to last.

Designed, manufactured and assembled in France, our fountains meet the quality, robustness and performance requirements expected for long-term projects.

## A solution tailored to your project

Every FONTAINEO project is unique. We assist you in choosing the model, installation and options to offer a solution that is perfectly suited to your uses, your environment and your footfall.

Purchasing allows you to control your costs over time while adding lasting value to your space.

## Comprehensive support

From the initial study of your project to the installation of your fountain, **FONTAINEO** supports you every step of the way.

You benefit from a reliable solution that complies with current health standards, as well as ongoing support from our technical teams.

# Location Longue Durée

**FONTAINEO** long-term rental is the ideal solution for enjoying a high-performance water cooler without tying up a large portion of your budget.

It allows you to control your costs while benefiting from reliable equipment, installed and monitored by our teams.

Designed for local authorities, businesses and sites open to the public, long-term rental offers you a turnkey, scalable and secure solution.

Financing will be provided through a partner financial institution.

The contract term is 24 to 60 months.

## Controlled budget

- Fixed monthly rent
- No heavy financial commitments
- Clear overview of costs over time

## Turnkey solution

- Project study
- Installation of the fountain
- Maintenance defined according to usage

## Flexibility

- Adaptation to your needs
- Possibility of upgrading equipment
- Guaranteed continuity of service

# Location événementielle

## Une solution pensée pour les organisateurs

Lors de l'organisation d'un événement, la gestion de l'eau potable doit être simple, fiable et rapide à mettre en place. La location événementielle **FONTAINEO** a été conçue pour répondre à ces contraintes, en s'intégrant facilement à l'organisation globale de votre événement.

## Simplicité et gain de temps

La solution est prête à l'emploi, sans gestion technique complexe, permettant aux organisateurs de se concentrer sur l'essentiel.

\*voirs conditions

## Adapted to site constraints

Our fountains are designed to adapt to event environments: high footfall, intensive use, temporary installation. They ensure smooth, hygienic water distribution in compliance with current health standards.

## Simplified organisation

Before, during and after the event, **FONTAINEO** supports organisers to ensure a controlled solution without additional logistical constraints.

# They trust us

More than just customers, they are employees and partners who are committed to our tailor-made solutions in the long term.
